CONTENTS OF VOLUME 5

PART 1 JANUARY 1959

The prediction of separation of the turbulent boundary layer. By B. S. STRATFORD *page* 1

An experimental flow with zero skin friction throughout its region of pressure rise. By B. S. STRATFORD 17

Two solutions for inviscid rotational flow with corner eddies. By CHIA-SHUN YIH 36

The structure of the jet-stream in a rotating fluid with a horizontal temperature gradient. By RUTH H. ROGERS 41

The effect of wall shape on the degree of reinforcement of a shock wave moving into a converging channel. By G. A. BIRD 60

The structure of a hydromagnetic shock in steady plane motion. By G. S. S. LUDFORD 67

An experimental investigation of the stability of Poiseuille flow. By RICHARD J. LEITE 81

On the stability of fully developed flow in a pipe. By GILLES M. CORCOS and JOHN R. SELLARS 97

Small-scale variation of convected quantities like temperature in turbulent fluid. Part 1. General discussion and the case of small conductivity. By G. K. BATCHELOR 113

Small-scale variation of convected quantities like temperature in turbulent fluid. Part 2. The case of large conductivity. By G. K. BATCHELOR, I. D. HOWELLS and A. A. TOWNSEND 134

Experimental search for the effect of compressibility in unsteady Couette flow. By LESLIE HROMAS and HAROLD DEGROFF 140

Forced plumes. By B. R. MORTON 151

The structure of a contact region, with application to the reflexion of a shock from a heat-conducting wall. By F. A. GOLDSWORTHY 164

PART 2 FEBRUARY 1959

The scattering of gravity waves by turbulence. By O. M. PHILLIPS 177

The slow motion of two or more spheres through a viscous fluid. By G. J. KYNCH 193

Temperature fluctuations over a heated horizontal surface. By A. A. TOWNSEND 209

The hypersonic viscous effect on a flat plate with finite leading edge. By ANDREW G. HAMMITT 242

Theory of thin airfoils in fluids of high electrical conductivity. By W. R. Sears and E. L. Resler *page* 257

The effect of uniform distortion on weak homogeneous turbulence. By J. R. A. Pearson 274

One-dimensional flow of an ionized gas through a magnetic field. By R. M. Patrick and T. R. Brogan 289

The effect of eddy viscosity on the velocity profile of steady flow in a uniform rough channel. By S. M. A. Haque 310

On the periodic fundamental solutions of the Stokes equations and their application to viscous flow past a cubic array of spheres. By H. Hasimoto 317

Reviews

Collected works of Theodore von Kármán 329

Part 3 April 1959

Experimental studies of supercavitating flow about simple two-dimensional bodies in a jet. By Edward Silberman 337

Steady flow through non-uniform gauzes of arbitrary shape. By J. W. Elder 355

A new approach to problems of shock dynamics. Part 2. Three-dimensional problems. By G. B. Whitham 369

The propagation of small disturbances in hydromagnetics. By G. S. S. Ludford 387

Cellular convection with finite amplitude in a rotating fluid. By G. Veronis 401

Ring vortices generated electromagnetically. By Chia-Shun Yih 436

The supersonic flow past a leading edge separation bubble. By A. W. Sharp 445

Rapid calculations for boundary-layer transfer using wedge solutions and asymptotic expansions. By H. J. Merk 460

On the drag of a flat plate at zero incidence in almost-free-molecule flow. By V. C. Liu 481

Reviews

Statistical Theory of Irreversible Processes 491

An Introduction to Fluid Dynamics 493

Mathematical Theory of Compressible Fluid Flow 494

PART 4 MAY 1959

The structure of isotropic turbulence at very high Reynolds numbers. By ROBERT H. KRAICHNAN *page* 497

The dispersion of marked fluid in turbulent shear flow. By J. W. ELDER 544

Instability in a slightly inclined water channel. By A. M. BINNIE 561

A pulsating sphere in a rotating fluid. By ALAR TOOMRE 571

On the stability of a spinning top containing liquid. By K. STEWARTSON 577

On the forced motion due to heating of a deep rotating liquid in an annulus. By T. V. DAVIES 593

An unsteady turbulent boundary layer. By STURE K. F. KARLSSON 622

A cylindrical sound pulse in a rotating gas. By L. E. FRAENKEL 637

REVIEWS

Theorie schallnaher Strömungen 650

Rheology: Theory and Applications, vol. II 652
